---

## SUMMARY

---

Innovative and detail-oriented web developer specializing in building dynamic and responsive front-end user interfaces. Proficient in React.js, JavaScript, TypeScript, and modern UI frameworks, with experience in state management, API integration, and performance optimization. Seeking an opportunity to leverage my expertise in React development to contribute to a forward-thinking organization.

## WORK EXPERIENCE

---

### ASL19

November 2017 – January 2025

#### *Web Developer*

Toronto, ON

- Developed dynamic front-end interfaces for 12 different websites and applications, emphasizing performance and scalability with reusable components.
- Contributed to component library used across 15 projects, reducing development time by 20% and ensuring consistency in UX/UI design across multi-platform applications.
- Improved application reliability, accessibility and day-to-day workflow by writing and executing comprehensive end-to-end tests.
- Conducted thorough code reviews for a team of 3 developers, providing feedback aligned with coding standards, quality, and best practices.
- Collaborated closely with design, back-end, and DevOps teams to gather requirements and deliver high-quality solutions.
- Technology used: React, NextJS, TypeScript, GraphQL, Emotion CSS, Python, Django, Wagtail CMS, Jest, Playwright, Figma.

### Pearson Embanet

May 2009 – November 2017

#### *Systems Support Analyst / Web Developer*

Toronto, ON

- Developed and managed 200+ websites and landing pages for various educational institutions.
- Implemented Bash scripts to automate server maintenance, cutting time spent on routine tasks by 50%.
- Ensured detailed adherence to design specifications translating business requirements into functional websites.
- Provided support for AWS cloud infrastructure by setting up new environments, maintaining version control systems, and overseeing website deployments.
- Technology used: HTML, CSS, JavaScript, jQuery, WordPress, Photoshop, PHP, AWS, and Bash.
